Legends

Prodigy of Mobb Deep

I watch the sun fall down to kill the day
Another part of me just went up in flames
'Cause I'm bored and dumb and dying to change
It's the simple life driving me insaneThen you explode in my head
And now you're all over me
I come alive with you
You know you set me free, let's goLet's burn this town right to the ground
And we'll go down like every legend before us
We'll part the seas, make history
While chasing dreams like every legend before usYou and me, we hit the streets
'Cause the thrill of living gives me energy
I wanna steal a car and rob a bank
I wanna find a cure that'll save the world'Cause our lives are going up in flames
As we watch like it's a movie
I come alive with you
You're like the drug inside of my headLet's burn this town right to the ground
And we'll go down like every legend before us
We'll part the seas, make history
While chasing dreams like every legend before usI open up like a window for you
So come on in and destroy me like you do
You come on in after midnight for me
And drag me out while the city falls asleepMartyrs and kings, heroes and thieves
We're chasing dreams like every legend before usLet's burn this town right to the ground
And we'll go down like every legend before us
We'll part the seas, make history
While chasing dreams like every legend before usLet's burn this town right to the ground
And we'll go down like every legend before us
Liars and kings, heroes and thieves
We're chasing dreams like every legend before us
