

# Like a Piece of Candy

## Gang of Thieves

In a city full of quiet streets where the pavement grows and the grass is dead  
There's a girl singing softly down to her little brother sleeping in his bed  
With her song she caressed the silence and drove the troubled dreams from his head  
Pulled him out of his isolation, the sweetest remedy he could have  
And she gave it all She's like a piece of candy

I wanna bring her back now

She's like a piece of candy Roll back to my younger days when the road was long and the cash was bread

Sleeping out in the mountain cold with the dog next to me in my bed

Going out to the western shore with another van, another song

No matter what the struggle said, she was worth every second all along

Yeah she gave it all

She's like a piece of candy

I wanna bring her back now

She's like a piece of candy

Looking back on all the sound I tasted, it makes me wanna go feast some more

Open ears are an invitation; another bridge, another door

A true breath of communication you can't buy in any store

And we played it all She's like a piece of candy

I wanna bring her back now

She's like a piece of candy
