

Hidden Track

Korn

In the deepest part of me
Like an unknown memory
I was never meant to find
Little seed of purity
And you don't belong to me
Still I'm blinded by its light
Don't try to make it right Does anybody know bout love
Does anybody care bout God
If you're with me sing sorrow Penny for your thoughts I fear
We need a little help round here
If you're with me sing sorrow When the stars don't ever heal
Do you fear you'll never feel?
What it is to be at peace
You're craving a release Does anybody know bout love
Does anybody care bout God
If you're with me sing sorrow Penny for your thoughts I fear
We need a little help round here
If you're with me sing sorrow I don't understand here
Why God would do me this way.
I lived a life
Was always good
The one thing I need to take away To take away
The one thing
(Take away)
The one thing
(Take away)
The one thing
(Take away)
The one thing
(Take away)
Just take away
The one thing
(Take away)
One thing to take away
The one thing
(Take away)
One thing to take away
Away away It took away my world
All it left was pain
And all this time was for nothing Does anybody know about love

Does anybody care about God
If you're with me sing sorrow Penny for your thoughts I fear
We need a little help round here
If you're with me sing sorrow
