

# Within My Reach

## Carpark North

Look here  
Look in my hand  
This leaf I found is grand  
I picked you up and let you go  
And I'll follow You are my hearts belief  
My wonder, my relief  
Now I can hear the angels breathe  
And I'll follow  
But I'm in over my head If you land within my reach again  
Would I have the strength to carry you?  
And if you land within my reach again  
I would hold your weight in my arms You seem too sad to try  
You're lost in old goodbyes  
I need to be there when you fall  
And I'll follow We're cutting through the dark  
Ignited with a spark  
The sky is closer than you are  
Still I'll follow If you land within my reach again  
Would I have the strength to carry you?  
And if you land within my reach again  
I would hold your weight in my arms
