

Feel

Victoria Duffield

Been there d-d-done it,
its the same every day
D-d-don't you, don't you want it,
Don't you want it to change? I'm on automatic and
about to ignite

B-but there's something
deep inside you, you want
to set it on fire Music is hypnotic,
move your body, you got it
When the rhythm takes over
you let it, just let go Love is subnotic
euphoric, exotic

So when you get the
shout out, you gotta
take it I want you to feel
(move your body)
(move your body)

The way that I feel Tonight I feel like
everything that we ever dreamed
is not as hard as it seems
to make it real But I want you to feel
I want you to feel Can you feel the rush
like you electric inside?

M-m-moving through our
lovers it's a serious vibe Better take a chance
you know I won't ask you twice

F-f-feel the fever rising baby,
this is your life Music is hypnotic,
move your body, you got it
When the rhythm takes over
you let it, just let go Love is subnotic
euphoric, exotic

So when you get the
shout out, you gotta
take it I want you to feel
(move your body)
(move your body)

The way that I feel Tonight I feel like
everything that we ever dreamed

is not as hard as it seems
to make it realI want you to feel
(move your body)
(move your body)
The way that I feelTonight I feel like, I
I got the music inside, and
I feel so alive, its so unreal
But I want you to feelIf you don't know where to
start, listen to your heart,
and feel your wayFeel, feel,
I want you to
Feel, feelI want you to feel, oh
(move your body)
(move your body)
The way that I feelTonight I feel like
everything that we ever dreamed
is not as hard as it seems
to make it realI want you to feel, oh
(move your body)
(move your body)
The way that I feelTonight I feel like, I
I got the music inside, and
I feel so alive, its so unreal
But I want you to feelJust let go, let go, let goFeel
