To Claudia On Thursday

The Millennium

Take off your shoes and feel the grass
Lie back and let the hours pass
Don't give a thought to anything in the world but you and me

Let the heavens kiss you with the breeze
Let the sunshine see you through the trees
Don't give a thought to anything in the world but you and me

Just take your time and let me get into your smile
Relax and find just what we can feel for a while

Open up your heart and breathe the air
Let the wind and light play in your hair
Don't give a thought to anything in the world but you and me

Just take a look and see all the love in the sky
And when you do the love will reflect in your eye

Sing me a song without a sound
And I will hear it through the ground
Don't give a thought to anything in the world but you and me
And everyone
