Today

Jam City

By the pool its cool to burn dough
But back in the world, duh
All these things we learned to let goAnd not so long ago
I was a child with a computer
All the fumes today
Make me wish I'd burnt it soonerBut anyway
I guess it's back to the
Porn and adderall
Next to no pay
But same cute + medicinal
Such a cute sleeping pill
In your bag todayOnly to see the stars fade away
Only to see my best friends fade away
Their ether floats past Honest Meats & LaceAnd I'm not trying to say you don't mind
But the worlds collide when we get in line
We don't have to waste time
White Men and liesAnd I know
We're not fine!
I want to take a walk
But they told me to keep calm, sit, smile.
