

# Blink

## Moloko

If you hear me, baby, blink!  
Do you even have the capability left to think?  
There seems to be a missing link  
Everybody's had a chance to see how far I can sink  
As I try to call you back from the brink  
If you hear me, baby, blink! You're just so uptight  
I don't suppose you have the energy to put up a fight  
You just might implode before I get a chance at cracking the code  
Take a good look around  
Milk and honey's getting thin on the ground  
If you hear me then make a sound  
If you hear me, baby, blink!  
As I try to call you back  
As I try to call you back from the brink  
If you hear me, baby, blink!  
As I try to call you back  
As I try to call you back from the brink  
There will be no recompense when I'm screaming in the face of your  
silence  
Still I draw a blank  
Can't go down any further than I've already sank  
If you're not there at all  
Someone tell me why I'm talking to the wall  
Do you hear me call?  
If you continue to ignore these reasonable demands  
I'll be drawing up a new plan  
The future is in your hands  
Isn't it a crying shame your little game of hide and seek  
Became so tiresome to me sometime last week?  
The future is bleak  
If you hear me, baby, blink!  
As I try to call you back  
As I try to call you back from the brink  
If you hear me, baby, blink!  
As I try to call you back  
The lights are off  
I know you're home  
I burn your letters begging me to leave you alone  
Keep your privacy  
Your inner thoughts mean nothing to me  
If you are waiting for me to take on my fair share of the blame  
Honey your efforts are in vain  
If you hear me call my name  
If you hear me, baby, blink!  
(if you hear me call your name)  
As I try to call you back

As I try to call you back from the brink [repeat]If you hear me, baby, blink!

As I try to call you back

As I try to call you back from the brinkAnybody, is there anybody in there?

Is there anybody, anybody in there?

Anybody, is there anybody in there?

Is there anybody?
