

# We're All Dying

## Gob

We feel sick, broken down  
Drug ourselves, underground  
No one cares, we curse you all  
We curse ourselves in hopes we fall Friday night and I made the best of it  
I passed out before I could invest in it  
Understand, it won't make sense  
But I don't value innocence  
I don't hope for anything Enemy, fuck the pride  
Come on over to our side  
We're the same, just afraid  
What's the difference when we're all dying Oh my God, we're so set  
In our own ways that we forget  
We are insignificant  
We'll be gone, soon be forgotten When you said to me I was dead to you  
I accepted that I disagreed with you  
What we want, we don't know  
Give us cages, let us go  
Give us cages, let us go  
(Give us guns) Enemy, fuck the pride  
Come on over to our side  
We're the same, just afraid  
What's the difference when we're all dying Enemy, fuck the pride  
Come on over to our side  
We're the same, just afraid  
What's the difference when we're all dying Enemy, fuck the pride  
Come on over to our side  
We're the same, just afraid  
What's the difference when we're all dying Enemy, fuck the pride  
Come on over to our side  
We're the same, just afraid  
What's the difference when we're all dying We're all dying  
We're all dying  
We're all dying
