

Welcome To (live)

Ani DiFranco

Welcome to:

No amount of stoned makes you feel ok

Welcome to:

This year's alone - brought to you by Christmas dayWelcome to:

The darkness into which prayin' people pray

It's quiet here except for this song

Now that everybody's goneBut hey

Least you don't have to play along today

Welcome to:

Something like elation when you first open your eyesJust 'cause it means

That you musta finally got to sleep last night

Welcome to:

The precipice between groundlessness and flightIt's quiet here except for this song

Now that everybody's gone

But hey

Least you don't have to play along todayBesides which

Welcome to:

Taking the good stuff down off of the shelf

And welcome to:The art of conversation with yourself

Welcome to:

Humming an unbroken tune

All day longYes it's quiet here

But hey

Least you don't have to play along today
