Sounds Like Love

Johnny Lee

You say that you can't get to sleep at night
And you don't know what it could be
Well, you can blame it on the moon for being too bright
But it sounds like love to meYou feel like a fever is coming on
Got your whole body feeling weak
But you still dance around and hum the same old song
Sounds like love to meOh, it sounds like love, it sounds like love to me
And love is so contagious
You're bound to catch yourself eventually
Oh, you might've even caught it from meWell, you've never felt this way before
So you worry about it naturally
Oh, well, there ain't no need to worry anymore
It just sounds like love to meOh, it sounds like love, it sounds like love to me
And love is so contagious
You're bound to catch yourself eventually
Oh, you might've even caught it from meYou say that you can't get to sleep at night
And you don't know what it could be
Well, you can blame it on the moon for being too bright
But it sounds like love to meYou know, it sounds like love, it sounds like love to me
And love is so contagious
You're bound to catch yourself eventually
Well, you might've even caught it from meYou know, it sounds like love, it sounds like love to me
And love is so contagious
You're bound to catch yourself eventually
Oh, you might've even caught it from me
