

# Everyone Is Gay

## A Great Big World

If you're gay then you're gay  
Don't pretend that you're straight  
You can be who you are any day of the week  
    You are unlike the others  
    So strong and unique  
We're all with youIf you're straight well that's great  
    You can help procreate  
    And make gay little babies  
    For the whole human race  
    Make a world we can live in  
Where the one who you love's not an issue'Cause we're all somewhere in the middle  
    We're all just looking for love to change the world  
    What if the world stops spinning tomorrow?  
We can't keep running away from who we areIf you're gay then you're gay  
    If you're straight well that's great  
    If you fall in between that's the best way to be  
        You've got so many options  
Every fish in the sea wants to kiss you'Cause we're all somewhere in the middle  
    We're all just looking for love to change the world  
    What if the world stops spinning tomorrow?  
We can't keep running away from who we areAnd we're all here in it together  
    We're one step closer to breaking down the walls  
        Everyone is gay
