

Lamb

Skid Row

I have been here for so long I've carried all the weight 'til something pulls me underneath the tide
Climb to where
the air is thin
so I can breathe again Still it makes me wonder deep inside Nothing's free We're all machines No one
bleeds Shadows of you sins are following you When it sucks you in, it's swallowing you King of the mountain,
that's what I am Space between the world and me
Everybody's someone else's sacrificial lamb
defying gravity Drink the chemicals we spill
'til something pulls me closer to the ground While hell is freezing over, over
Our eye is on the kill
