

Pick Your God Or Devil

Robin Foster

We'll take a face and make it chew
Creating memories to destroy the truth
Can you erase battle scars, hurts we can't absolve now just breath

----- heavy size watching the floor don't count the days ---- the past died you're free now

Trampling down round n round open the door release the --- ghost the past died you're free

Where to hide? Don't try to run far away far away now
Where to hide? Don't try to run far away far away now

They're just memories they're just
just memories let me take them away
Sleep

Once taken away the truth will come out and play so make it what you will
Make it what you will right now
--- got the devil somehow

Be still it's all still just to stand still so be still it's all still just to stand still so be still it's all still just to stand
stand still

Where to hide? Don't try to run fat away far away now
Where to hide? Don't try to run far away far away now

Sleep
Sleep
Sleep
Sleep
