

Sickfest

Grinspoon

You can't try and sink your thoughts into my brain
Contradict, you've always been too lame
Guilt has always found you hiding away
Wallow in your pity You make sick, I make you
Every time I see you I break you
You make sick, I make you
Every time I see you I break you You make sick I make you
Every time I see you I break you
You make sick, I make you
Every time I see you I break you Train your mind to believe all that you say
Stab yourself so he will turn in today today
Ben and Frank, bliss isn't what you prayed
Don't you ever say what matters You make sick, I make you
Every time I see you I break you
You make sick, I make you
Every time I see you I break you You make sick, I make you
Every time I see you I break you
You make sick, I make you
Every time I see you I break you Break you down, yeah, I'm breaking you down
You're broken down Crave me You can't try and sink your thoughts into my brain
Contradict, you've always been too lame
Guilt has always found you hiding away
Wallow in your pity You make sick, I make you
Every time I see you I break you
You make sick, I make you
Every time I see you I break you You make sick, I make you
Every time I see you I break you
You make sick, I make you
Every time I see you I break you You make sick, I make you
Every time I see you I break you
