All Too Human

The Rakes

The distance we have come has got me pinin'
For a touch up once familiar and excitin'
And though up yonder charts we might be climbing
To do it without you is very frightenin'Now you've got a job you hoped and work for
We're both pretty much where we wanna be
We hardly get any time together
'Cos now we're both far too busyHuman all too human
I'm at the mercy of you
You got me right where you want me
There's nothing else I can doHuman all too human
I'm all tense and strained
Just can't bring myself to tell you
I can't keep livin' like thisComin' back to the flat now seems so lonely
You're not there so it's just as I left it
The chair that you sit in is now empty
Its arms can't hold me like they're meant toHuman all too human
I'm at the mercy of you
You got me right where you want me
There's nothing else I can doHuman all too human
I'm all tense and strained
Just can't bring myself to tell you
I can't keep livin' like this(Human all too human)
I need you, I need you, I seriously do
(Human all too human)
I'm not even drunk yet, I only had a few
(Human all too human)
I need you, I need you, I seriously do
(Human all too human)
I'm not even drunk yet, I only had a fewYou got me right where you want me
There nothing else I can doHuman all too human
I'm all tense and strained
Just can't bring myself to tell you
I can't keep living like thisHuman all too human
Human all too human
Human all too human
Human all too human
