Locked In

Scary Kids Scaring Kids

You're lying through your teeth it doesn't seem to be that bad
Until a good friend's corpse is lying on the floor
Well, I can't seem to get by when all I'm living on is fake smilesWe all seem to be on top of our own little world
But that won't last long for most of us
We all tend to be a little too into ourselves
But that won't last long, it won't last longAn eternity it seems and it's starting to become that bad
It's taking too long and I am impatient
Well, I can't seem to get by when all I'm living on are lost milesWe all seem to be on top of our own little world
But that won't last long for most of us
We all tend to be a little too into ourselves
But that won't last long, it won't last longShut your mouth and listen, there's no time for reminiscing
Because thinking of the past just never changed a thingSome thing's coming over me
To see between the lines you thought you'd never read
Some thing's coming over me
To read between the signs you thought you'd never seeAnd see between the lines you thought you'd never read
You thought you'd never read
You thought you'd never read
Between the lines you'd never readWe all fall back and step in line
We all fall back and step in line
Step in line
Step in line
Step in line
