[RazzTheMad](#)

Let's put some miles between us  
And everything that comes between us  
Let the spirits lead us  
And the hunger feed us  
Live by the morning light  
Empty days and fill the nights  
Never say our goodbyes  
Never lay down and die  
And now we're looking for a way out  
Even the closest stars  
Are still so far

The only thing that tomorrow brings is that it will become today  
On a night full of whispering don't let your hopes get carried away  
Petty crimes they were just for show, now you're waiting for the trouble to blow over  
You've got nowhere to go, you've got nowhere to go 'cause you're already home

And now we're looking for a way out  
Even the closest stars  
Are still so far  
Some people say it's never enough  
Some people say what they mean  
Some people say that they've had it tough  
Some people live in the dream  
Some people live like slaves to money  
Some people live on their knees  
If you want to live to taste the honey  
Don't go kill all of the bees  
And now we're looking for a way out  
Even the closest stars  
Are still so far  
Are still so far  
Are still so far  
Are still so far
