Perfect Sense

Take 5

You like to run and I like to chill, if I'm chillin' with you, girl
Every second that I have you know I will, I'll spend it with you
You're into movies and restaurants and that's okay, but
Spending nights with you is what I want, 'cause I like it that wayPeople say that it won't work, we're not compatible
As long as we're here on this Earth, we'll be unseperableYou, me, different as night and day all we ever hear them say
What seems to be totally illogical, makes perfect sense to me
We might be light years apart, still we are tight at the heart
It's completely and totally illogical, but it makes perfect sense to meYou like to go on exotic cruises to Caribbean Islands
Sip margaritas on the beach in Mexico
I like to go walking underneath the stars
Moon shining down on us, you and me holding hands
We understand, we've got a planInfact, where ever you are is where I wanna go
Don't you know?
They can believe what they will, we'll prove them wrong
Come down on our high water our love will still be strongYou, me, different as night and day all we ever hear them say
What seems to be totally illogical, makes perfect sense to me
We might be light years apart, still we are tight at the heart
It's completely and totally illogical, but it makes perfect sense to meI always heard that opposites attract
You and I are living proof, no matter what
Love survives after allYou, me, different as night and day all we ever hear them say
What seems to be totally illogical, makes perfect sense to me
We might be light years apart, still we are tight at the heart
It's completely and totally illogical, but it makes perfect sense to meYou, me, different as night and day all we ever hear them say
What seems to be totally illogical, makes perfect sense to me
We might be light years apart, still we are tight at the heart
It's completely and totally illogical, but it makes perfect sense to me
Yeah
