

Come Back

Depeche Mode

Come back, come back to me
I've been waiting here patiently
Come back, come back to me
I've been waiting here patiently Walking a thin white line
Between love and hate
Wasting all of my time in another world, in another place
I could use a little company
A little kindness go a long way Weeks turn into months
Months turn into years
Reaching the same conclusions
Gathering up the fear Come back, come back to me
I've been waiting here patiently
Come back, come back to me
I've been waiting here patiently Light will always shine in the heart of you
In truth and in reality
Only blindness can hide it away
I could use a little restraint
A little kindness can go a long way Weeks turn into months
Months turn into years
Reaching the same conclusions
Gathering up the fear Living the same delusion
Gathering up the fear
Gathering up the fear
Gathering up the fear
Gathering up the fear Come back, come back
Come back, come back
Come back
