

"Max is Stable"

Evermore

[Teacher:] "Max is stable,

he's perfectly able to fit into school,

he just plays the fool.

He's looking for attention, did i forget to mention?

Give him his medication before his education." [Parent:] "Max was draining, always complaining,

but he needs no supervision now he's watching television.

As each year grows, all his favourite shows,

they keep him out of trouble in his satellite bubble." Wake me up, I've had enough, I've seen too much.

I don't want to fall away.

A speck on the globe drawn into the glow.
