

As Civilians Die Again

Harum Scarum

Join your country's army, America won't let you die.
You won't have to fight ground wars, just kill from the sky.
You should be ashamed dropping bombs from the sky.
Drastic actions for reactions as civilians die.

This is warfare done it again.
Bomb the people, bomb the land.
You don't walk away with their dirt and blood on your hands.

This is warfare done it again.
bomb the people. bomb the land.
Blood runs down the empty streets where america's flag will stand.

Join your country's army,
America won't let you die.
You won't have to fight ground wars, just kill from the sky.
You should be ashamed dropping bombs from the sky.
Drastic actions for reactions as civilians die.

Think we've heard it, heard it all before.
Sick of hearing about this fucking war.
But we yanks have never seen it there.
So why do we have to, why do we have to care?
Warfare is a fallicy and DC's getting hard.
Turn on your TV set, sit back and watch the war.
