

Ask The Lonely

Four Tops

You've been thinkin it's over
What's the chip on your shoulder?
Out side were solid rainbows
Inside is where the heart grows Picking up the pieces
Something more to believe in
As you search the embers
Think what you've had, remember Hang on, don't you let go now
You know, with every heartbeat, we love
Nothing comes easy
Hang on, ask the lonely You've got some fascination
With you high expectations
This love is your obsession
Your heart, your past possession Let down your defenses
Won't be up to the one who cares
As you search the embers
Think what you've had, remember Hang on, don't you let go now
You know, with every heartbeat, we love
Nothing comes easy
Hang on, ask the lonely When you're feeling love's unfair
You just ask the lonely
When you're lost in deep despair
You just ask the lonely When you're feeling love's unfair
You just ask the lonely
When you're lost in deep despair
You just ask the lonely When you're feeling love's unfair
You just ask the lonely
When you're lost in deep despair
You just ask the lonely Ask the lonely
When you're down in deep despair
When you're down in deep despair
Ask the lo-lo-lonely, lo-lo-lonely
Lonely
