

# Reptile

## Hatemagick

She spreads herself wide open to let the insects in  
She leaves a trail of honey to show me where she's been  
She has the blood of reptile just underneath her skin  
Seeds from a thousand others drip down from within

    Oh my beautiful liar

    Oh my precious whore

    My disease, my infection

    I am so impure

    Give in

Devils speak of the way in which she'll manifest  
Angels bleed from the tainted touch of my caress  
Need to contaminate, to alleviate this loneliness

    I now know the depths I reach are limitless

    Oh my beautiful liar

    Oh my precious whore

    My disease, my infection

    I am so impure

    Ohh

    Ohh

    Oh my beautiful liar

    Oh my precious whore

    My disease, my infection

    I am so impure

    Oh my beautiful liar

    Oh my precious whore

    My disease, my infection

    I am so impure
