

Stargazer

ISLAND

Fading star
You found love, but went too far
Smile like you're feeling fine
As Gods and angels take their flight
And those golden wings shine down like fire
What mortal kings could fall from higher
Wait in line
Amongst the sacred, side by side
It's not love you're needing now
We're all stargazing, time to time
And those golden wings shine down like fire
What mortal kings could fall from higher
And fade like sun
You shine like you're waving from the sky
You see that you're saving my life
Stargazer, these lights are ours
And fade like sun
And those golden wings shine down like fire
What mortal kings could fall from higher
I seen the shadow of the Earth on your soul
And I feel the fire, the end of the road
Stargazer, these lights are ours
These lights are ours
