

Beautiful Thing

Grace VanderWaal

You think that you know my heart
And you probably do
So I'm always with you
I could stay with you for hours
In an empty room
Never get bored
Never have nothing to do You're my other half
You're what makes me me
What makes me smile
When I fall down and can't get back, get back, get back up
On my feet You're a beautiful thing
We're a beautiful thing together
Even when the weather is low
You're a beautiful thing
We're a beautiful thing together
Even when the weather is low
We can find the rainbow
Up in the sky
You'd say don't you cry, it's all gonna be alright
That's a beautiful thing Make hours into seconds together
The weight of the world feel like a feather
Cause we're holding it right in our hands You're my other half
What makes me me
What makes me smile
When I fall down and need to get back up on my feet You're a beautiful thing
We're a beautiful thing together
Even when the weather is low
We can find the rainbow
Up in the sky
You'd say don't you cry, it's all gonna be alright
No, it's all gonna be alright
That's a beautiful thing
