Flurry

ApologetiX

Everything's snow flurries
And everyone's snowflakes
Whatever God has sent you
Is evidence that snow adds up
It all combines and now you cannot lift it off
Like a branch about to somehow bend or fallAnd you can read in Romans one
You can read nineteen
Nowhere else can take him
From all that we have seen
I wonder what you'll do when
Imagine there's no God
This notion seems ingenious
But that's not very smartCan you fake it all away-hay
Can you shake it all away-hay
When it's shoveled in your fa-hace
As plain as it can be-hee
Can't explain it all away-hay
'Less your brain's evolved in way-hays
Well it doesn't take much spaceEveryone is straying
They won't accept God's real
They make up their own ethics
Depending on just how they feel
But I am shocked at how you cannot hear that call
While the world around you shuts out theirs of GodAnd you can read the Psalms once
You can read nineteen
No other god could save you
So won't you please come clean
And Romans chapter two says
"No matter where you are
Your conscience bears me witness
'Cause God's life's in your heart"Can you fake it all away-hay
Can you shake it all away-hay
When it's shoveled in your fa-hace
As plain as it can be-hee
Can't explain it all away-hay
'Less your brain's evolved in way-hays
Well it doesn't take much space
As plain as it can be-hee-Guitar solo-OoohNobody goes to God and shouts
Nobody told you judgment day

You know what shows you where to turn
Showed you with the stuff you paid
Folks who are sure to testify
Perfect do what your conscience said
Everyone shows you where to turn
Showed you as you fade awayCan you fake it all away-hay
Can you shake it all away-hay
When it's shoveled in your fa-hace
As plain as it can be-hee
Can't explain it all away-hay
'Less your brain's evolved in way-hays
Well it doesn't take much space
As plain as it can be-heeNo-oooAs plain as it can be
As plain as it can beCan you fake it;
Or shake it all away
As plain as it can be
Can't explain it all away
'Less your brains evolved in ways
As plain as it can be
As plain as it can be...
