

# Ordinary Fight

## I Against I

You'd think we might have learned from the problems that occurred  
But it seems I'm truly wrong there  
The war was useless but what did it teach us  
You use violence and hatred again They say it's just for a little influence  
But I can see it's here for acceptance  
They say it's all for the cause of our society  
And they may think so but don't tell it to me We have to do something that just doesn't feel alright  
We have to use violence but not of a common kind  
These Nazis around us keep acting as if they are blind  
It's not an ordinary fight Discriminating acts keep hunting through my brain  
But I know we are all one and the same  
So what if there's a difference between the color of our skin  
This doesn't mean we're living with a sin But you keep telling me I'm blind  
I think your brain's a bit behind  
'Cause I can't believe it when you're telling me that I'm blind  
I won't support an ordinary fight
