

Endless

Dave Gahan

In the cold of the full moon on this night
Time itself it slips away, now you are mine
Slowly hours pass all through the night
Together we can disappear for a while Now I am still forever and ever and ever
Now I am still forever and ever and ever
Endless, endless, now I am still
Endless, endless, your body is endless Watching the hourglass on that night
We touched the stars
And reached the moon for a time
I'm lost in a moment with you, it feels right
We're floating above the stars, you and I Now I am still forever and ever and ever
Now I am still forever and ever and ever
Endless, endless, now I am still
Endless, endless, your body is endless I am still forever and ever and ever
Now I am still forever and ever and ever
Endless, endless, now I am still
Endless, endless, your body is endless I am still, now I am still
Now I am still, now I am still
