

Half Machine Lip Moves

Chrome

I can feel the april haze
I will now turn you out
Out to win the heroine
Does it hide? Does it prove?
They're moving on to passion times
But does the world for your love resemble mine
I can feel the void of a world surreal
They're going home to a past left behind
And I guess the band will be playing with angel fire
So I saw you in the zoo in the parking lot
Can't you see what you need you've already got
