Right Part Of Me

Toto

Hello, girl, you're good to see
Love your face shining down on me
How's it feel with the warm winds blowing
Hello, girl, you're good to know
Love your smile, I love your glow
How's it feel with the warm winds blowing
Must have touched the right part of me
The sun in your eyes
You came running in from the start
Connected all the right numbers
In the picture you were painting of me
Listen girl, I can't let go
The time is right, I have to know
What's it like, when the fire is burning
Must have touched the right part of me
The sun in your eyes
You came running in from the start
Connected all the right numbers
In the picture you were painting of me
Must have touched the right part of me
The sun in your eyes
You came running in from the start
Connected all the right numbers
In the picture you were painting of me
Must have touched the right part of me
The sun in your eyes
You came running in from the start
Connected all the right numbers
In the picture you were painting of me
