We are going faraway
We are going faraway
We are going faraway
From Utah

Don't you look down
]Don't you look down

Don't you look down
Don't you look down

You are high above ground

We are driving with our friends
We are driving to a faraway place

Take it down to the ground
Take it down to the ground
Take it down to the ground
With me

Don't you think you're high enough
Don't you think you're high enough
Don't you think you're high enough
For the fall

We are driving with our friends
We are driving to a faraway place

Faraway place
Faraway place

We are driving with our friends
We are driving to a faraway place

Faraway place
Faraway place

Take it down to the ground
Take it down to the ground

Take it down to the ground
With me

Don't you think you're high enough
Don't you think you're high enough
Don't you think you're high enough
For the fall

We are going faraway
We are going faraway
We are going faraway
From Utah

Don't you look down
Don't you look down

Don't you look down
Don't you look down

You are high above ground

We are driving with our friends
We are driving to a faraway place

Faraway place
Faraway place

We are driving with our friends
We are driving to a faraway place

Faraway place
Faraway place

We are driving with our friends
We are driving to a faraway place

Faraway place
Faraway place
