

The Necromancer

[Crobot](#)

In the wake of the morning
The breaking of day
The land of the deadites lies just this way Their souls have arisen
An army awake
The hand of the mage enslaves All hail! The Necromancer
All hail, the Necromancer The killed get up and kill
In the light of the moon
The breath of the night
Bloody mist on the battlefield
This war ends tonight Life of the lifeless we'll try and take
Pillage one and all, burn 'em at the stake All hail! The Necromancer
All hail, the Necromancer The killed get up and kill
The killed get up and kill What does it take to slay the slayed?
How do you hunt the hunted?
All hail! The Necromancer
All hail, the Necromancer The killed get up and kill
The killed get up and kill
