

# Chemistry

## Stereo Skyline

Oh, oh, oh, what's the chance of you and me?  
The two of us in a make believe  
3-D movie let's subtract the math  
And talk about chemistry She still counts on her fingers sometimes  
But she looks oh so fine by my side  
Well, isn't she something?  
I just can't stop humming, no And maybe, girl, you rock my world  
Flip turn it upside down and inside out  
Feeling just fine like we should alright  
Rolling out of bed just to do it all again  
Grab my shoes and walk right out the door  
Girl, I couldn't ask for more Oh, oh, oh, let's forget about math and history  
The Milky Way, the galaxy  
The gravity that's pulling you  
Like glue right towards me And maybe, girl, you rock my world  
Flip turn it upside down and inside out  
Feeling just fine like we should alright  
Rolling out of bed just to do it all again  
Grab my shoes and walk right out the door  
Girl, I couldn't ask for more 'Cause the gravity keeps happening  
To disappear when you are near  
But you seem to be what's making  
Me miss a beat Maybe, girl, you rock my world  
Flip turn it upside down and inside out Maybe, girl, you rock my world  
Flip turn it upside down and inside out  
Feeling just fine like we should alright  
Rolling out of bed just to do it all again Maybe, girl, you rock my world  
Flip turn it upside down and inside out  
Feeling just fine like we should alright  
Rolling out of bed just to do it all again  
Grab my shoes and walk right out the door  
Yeah, girl, I couldn't ask for more
