Chemistry

Stereo Skyline

Oh, oh, what's the chance of you and me? The two of us in a make believe 3-D movie let's subtract the math And talk about chemistryShe still counts on her fingers sometimes But she looks oh so fine by my side Well, isn't she something? I just can't stop humming, noAnd maybe, girl, you rock my world Flip turn it upside down and inside out Feeling just fine like we should alright Rolling out of bed just to do it all again Grab my shoes and walk right out the door Girl, I couldn't ask for moreOh, oh, oh, let's forget about math and history The Milky Way, the galaxy The gravity that's pulling you Like glue right towards meAnd maybe, girl, you rock my world Flip turn it upside down and inside out Feeling just fine like we should alright Rolling out of bed just to do it all again Grab my shoes and walk right out the door Girl, I couldn't ask for more'Cause the gravity keeps happening To disappear when you are near But you seem to be what's making Me miss a beatMaybe, girl, you rock my world Flip turn it upside down and inside outMaybe, girl, you rock my world Flip turn it upside down and inside out Feeling just fine like we should alright Rolling out of bed just to do it all againMaybe, girl, you rock my world Flip turn it upside down and inside out Feeling just fine like we should alright Rolling out of bed just to do it all again Grab my shoes and walk right out the door Yeah, girl, I couldn't ask for more
