

# The Logic Of Crocodiles

## Every Time I Die

I am a very important person, I've acquired a genetically  
Altered handshake capable of speeds up to 30 mph  
Hair arranged by the most advanced landscape  
Surveillance operators our company can afford I have a very expensive pen, I use big words quite often  
In substitution for semantically equivalent words  
I attribute this success to my professional  
Demeanor and my strong stock portfolio Though it may not appear so, I am quite comfortable in my  
surroundings  
I have everything, let me show you around  
Smile you fucker, it's not often you get this chance  
Love is just an exchange of corporate documents I've reviewed your rapport and I feel you're  
A prospect for mechanical salvation  
This is a joint venture that will be mutually  
Advantageous to both parties involved Technically this is just a business merger  
A consolidation of liquid assets  
We are respectively geared towards customer service  
There is a great possibility for corporate sponsorship If you're willing I am sure we could synchronize agendas  
Swift, and efficient satisfaction, satisfaction baby  
Through innovative planning we could form a strong  
Strategic partnership capable of overcoming sensitive  
And adverse predicaments which will be discussed  
At the next goals assessment meeting Promotion possibility and additional benefits  
Are diagrammed in my preliminary objective outline  
Raises are granted based on performance
