Descension Complete

Tanner Helms

Trillions of stars all in the sky
Do you remember which pact you came by?
When we were born, they erased our minds
Descension Complete welcome to mankindA Universe with infinite choices, still we chose to come here
I needed to pyramid under a timed atmosphere
It's not worth living unless there's something to die for
It's a lifetime of growth that stays with us forevermoreTrillions of stars all in the sky
Do you remember which pact you came by?
When we were born, they erased our minds
Descension Complete welcome to mankindSo you're where you're at
Well whatcha gonna do from here?
Everyone lives on, but not everyone lives hereA lifetime of experiments with the truth
Grows a life in age to it's youth
So plant trees in your backyard to stay
Atomically connected to your birth starTrillions of stars all in the sky
Do you remember which pact you came by?
When we were born, they erased our minds
Descension Complete welcome to mankindI'm a constellation in the sky
With Pollux in my left eye
There's more to what you say and do
A cipher lives inside of you
The Mother Ship is here today
And you, you already paid
So go outside and breathe her in
And feel your life begin againTrillions of stars all in the sky
Do you remember which pact you came by?
When we were born, they erased our minds
Descension Complete welcome to mankind
