Rising Up

Capleton

Yesterday I saw a B-girl crying, yesterday I saw a B-girl crying I walked up and asked what's wrong She told me that the radio's been playing the same song all day long So I told her I got something you've been waiting for I got something you've been waiting for Yesterday I saw a B-girl crying, I walked up and asked what's wrong She told me that the radio's been playing the same song all day long So get your glass lift it up in the toast position We getting paper like John Travolta get it ?Cause we focused with it, we supposed to get it You know me and my whole squad, we so committed We not the kids cooling out on the sofa with it We about to dominate the globe like Oprah did it We getting paper like John Travolta, nigga Well, I'm a downtown shooter, who that? The crown ruler is back, he kind of grew into the shape of a mack Look how I do it, yo, I'm taking you back This how you rise down to the foundation, how sacred is that? I'm from the number one place on the map The generational gap with yet another sensational track And we don't stress for nothing, I just press the button It's as simple as just making it hap' To all the frauds, stop faking, relax and to the broads if you caking Then clap, then shake it without breaking your back I know the world been waiting for that You been aching for that ?cause what they playing on the station is wack And I'm a legend in the flesh that dress to impress The best is that which I accept and nothing less My stacks is grotesque my squad so fresh You know it?s Black Thought and your boy the broquest but Yesterday I saw a B-girl crying, I walked up and asked what's wrong She told me that the radio's been playing the same song all day long So get your glass lift it up in the toast position We getting paper like John Travolta get it ?Cause we focused with it, we supposed to get it You know me and my whole squad, we so committed We not the kids cooling out on the sofa with it We about to dominate the globe like Oprah did it We getting paper like John Travolta, nigga

Hip hop ain't dead ?cause the pulse is in us
I got the Everclear flow, they mimosa with it
We are the hope of the culture, they supposed to listen
And I'm supposed to pivot like I'm a forward in the league
I'm Oden with it

Yet, don't owe them niggas nothing but potent lyrics

But if you ain't got the dance, they revoke your spinning So good rappers ain't eating they Olsen twining But I'm so committed they have grown familiar With the counterfeit hitters they so-so with it, but they are Sosa with it They Mark McGuire with the written, I'm Rodriguez On the road to riches, this is the fork I'm hitting This is the trial and error era, no co-defendant I push The Seed every time like I'm Cody with it I said the one-hit wonders pneumonia to us I don't know you niggas, hit the road, my nigga Yesterday I saw a B-girl crying, I walked up and asked what's wrong She told me that the radio's been playing the same song all day long So get your glass lift it up in the toast position We getting paper like John Travolta get it ?Cause we focused with it, we supposed to get it You know me and my whole squad, we so committed We not the kids cooling out on the sofa with it We about to dominate the globe like Oprah did it We getting paper like John Travolta, nigga Where my grimy figures at? Look lively addressing the captain Show me where your first impression is at And where your dedication to the true profession is at How you laugh, answer me, what kind of question is that? I'll show you where my rare essence is at, the adolescence of rap

where my rare essence is at, the adolescence of rap
The real muscle in the message of that
My name trouble I'm a blessing to rap

And you can check my stats ?cause worldwide they attesting to that So nigga, listen you can probably learn a lesson perhaps
How I'm like Bobby DeNiro, Joe Pesci and them cats
Am I the unsung hero?

Oh yes, if you asking anybody that's aware of the classics
They'll tell you I'm a legend in the flesh that dress to impress
The best is that which I accept and nothing less
My stacks is grotesque, my squad, so fresh
You know it's Black Thought and your boy the broquest but
Yesterday I saw a B-girl crying, I walked up and asked what's wrong
She told me that the radio's been playing the same song all day long
So get your glass lift it up in the toast position

We getting paper like John Travolta get it
?Cause we focused with it, we supposed to get it
You know me and my whole squad, we so committed
We not the kids cooling out on the sofa with it
We about to dominate the globe like Oprah did it
So let?s go
