

# Welcome To The Fishbowl

Kenny Chesney

You see me and I see you  
Can't hide nothing cause it's all see-thru.

Don't be fool enough to tell a lie  
Satellite is watching up in the sky

There for all the world to know  
What we do and where we go

Welcome to the fish bowl

You don't have to be famous now to be a star  
Just get caught on radio and now there you are.

You just lost your privacy  
Now your swimming around in here with me

Everybody else we know  
It's all a big freak show

Welcome to the fish bowl

Everybody's business is everybody's business and that's a big business now  
Who's gonna be the first to get the story out

Who loves who and where they gonna meet  
Colbert pictures that proves they cheat

Gods is getting hard to breathe this way  
Everybody's life is on display  
It's gotten out of control  
Tell me do you feel exposed

Well, welcome to the fishbowl

Guitar

Everybody's business is everybody's business and that's a big business now  
We're all in here together and we can't get out

Welcome to the fishbowl

To everybody else we know  
It's all a big freak show

Welcome to the fishbowl

There for all the world to know  
What we do and where we go

Welcome to the fishbowl  
Yea welcome to the fishbowl

You had to chase a dream you had to be a star  
Background - yea, yea, Welcome to the fishbowl

A house in the hills, money, sex, boats, and cars  
Background - yea yea, welcome to the fishbowl

Now ya gotta name that everybody knows  
Background music - yea, yea, welcome to the fishbowl

No need to cry and moan

Welcome to the fish bowl

---
