

After You

Chastity Brown

Now we're going to
the place we're headed to
when I was after you

And you stand right there
I just grab your hand
Pray ya feel it too

Now we're in the car
Going to the place
That you say you're from

And the land stretches out
it goes for miles and miles
to the setting sun

And we walk right up to
The place we're headed to
When I've been after you

Now we're headed home
The place we finally know
As our own

And you lay your head
Right beside my head
Pray ya feel it too

Now we're going to
The place we're headed to
When I've was after you
