Only One Cloud

Beth Rowley

There's only one cloud in the sky
There's only one cloud in the sky
And it's hanging, hanging round over my head
The weather man said It could change
The weather man said it could changeBut it looks like my dark cloud is here to stayLightening strikes me down
Lightening strikes me down
Shakes me up and puts me down to the ground
I feel so alive
I feel so alive
There's only, only one cloud in the skyI love this cloud of mine
I love this cloud of mine
It's a crazy, a crazy thing to say
If my cloud should ever go
If my cloud should ever go
My life, my life would never be the same.Life would, my life would never be the same
