Dark Trance

Free Energy

Down on Video Street
Night hearts beat
Where the fever's burning onSo come on, just be my sis
One last kiss
'Cause our lips are made with glass
They're ready to broadcast rebel trashBut if you wait too long
Keep telling yourself
That moment has already passedYou're gonna miss that song
You might never meet that girl
Then you blink, oh
And the night is over too fast
You're making love to the pastKid, the love that we got
The light we're on
Burns bright tonight, come onWe belong to something we feel
But we never can see
Do you know that we're always free?
That's how we're supposed to beBut if you wait too long
And keep telling yourself
That moment has already passedYou might miss that song
You may never meet that girl
Then you blink, oh
And the night is over too fast
Well, don't you want it to last?Oh, the sun is going down
The night is coming 'round
There ain't a single sight nor soundAnd, oh, the feeling's coming on
The city lights are gone
The fever's gonna stay till dawnAnd oh, whoa, whoa, whoa
Oh, whoa, whoa, ohDo you love her, do you wonder?
Why the star-ship shines above?
Do you love her, do you want her?
Have you ever had enough?Do you love her, do you wonder?
Why the star-ship shines above?
Do you love her, do you want her?
Have you ever had enough?Do you love her, do you wonder?
Why the star-ship shines above?
Do you love her, do you want her?
Have you ever had enough?Do you love her, do you wonder?
Why the star-ship shines above?
Do you love her, do you want her?

Will you ever have enough?
