

Anywhere On Earth You Are

Alan Jackson

I've been riding these blue highways
Another night has made me stop
A weary bones can go no farther
And here's where they'll drop
In my dreams your arms will find me
They will hold me through the night
And release me to my journey
As another day grows live
I've got so many miles to go
And promises to keep
Right now all I wanna do
Is be anywhere on earth you are

I've always been a Gypsy
And the road caused me to roam
But each day brings me closer
To the place where we call home
Still got many miles to go
And promises to keep
Right now all I wanna do
Is be anywhere on earth you are
In my dreams your arms will find me
They will hold me through the night
Right now all I wanna do
Is be anywhere on earth you are
