

I Wanna Be With You

Lady Gaga

It's off, it's on
The party's just begun
Take off, and run
Let's celebrate the fun of being young
I don't wanna grow up
I don't wanna grow up But when the lights come on
You lift me up, and I feel strong I won't be right without you
And I might break without you
I rather be poor and happy than rich and alone
I'll write hit songs about you
No matter how we'll get through
I'll keep on singing for living, but I wanna be in love
And I wanna be with you I wanna be with you... Lights off, lights on
The music has begun
More light, you run, and get the bad guy's gun
I love the songs that you play
And I don't care what they say
Cause I was born this way When I hear you scream, I hear the top of the stage, and
Close my eyes, I know exactly who I am I won't be right without you
And I might break without you
I'd rather be poor and happy than rich and alone
I'll write hit songs about you
No matter how we'll get through
I'll keep on singing for living, but I wanna be in love
And I wanna be with you I wanna be with you... I won't be right without you
And I might break without you
I rather be poor and happy than rich and alone
I'll write hit songs about you
No matter how we'll get through
I'll keep on singing for living, but I wanna be in love
And I wanna be with you Wanna be with you, wanna be with you
Wanna be with you, I wanna be with you No matter what breaks me, I wanna be with you
