

# Phased (EP)

## All About Eve

After laughing at the stars the time  
Arrives to coincide with all the chaos and  
The sparks of when two worlds collide  
And it's been hours now ; feels like days. We've been hours now, in these waves.  
We've been phased we've been  
Alchemized... melted, liquefied and dried  
And left to crystallize. And it's been hours now ; feels like days.  
We've been hours now in these waves  
We've been phased...
