You've Got a Way

DJ Encore

You can get me right here, where I wanna be
Feeling it all over, deep inside of meEverytime I think I'm close, you take me closer
Even now when you're away, I feel you're nearYou've got a way of making sunshine out' the rain
You've got a way of turning ashes into flames
I can't believe you're making darkness into light
You're making all my contradictions turn out rightYou're in my horizon, everywhere I see
And when I try to reach you, you're right next to meEverytime I think I'm close, you take me closer
Even now when you're away, I feel you nearYou've got a way of making sunshine out' the rain
You've got a way of turning ashes into flames
I can't believe you're making darkness into light
Like you make all the famous cliches sound so rightEverytime I think I'm close, you take me closer
Even now when you're away, I feel you're nearYou've got a way of making sunshine out' the rain
You've got a way of turning ashes into flames
I can't believe you're making darkness into light
You're making all my contradictions turn out rightYou've got a way of making sunshine out' the rain
You've got a way of turning ashes into flames
I can't believe you're making darkness into light
Like you make all the famous cliches sound so right
