

You've Got a Way

DJ Encore

You can get me right here, where I wanna be
Feeling it all over, deep inside of me
Everytime I think I'm close, you take me closer
Even now when you're away, I feel you're near
You've got a way of making sunshine out' the rain
You've got a way of turning ashes into flames
I can't believe you're making darkness into light
You're making all my contradictions turn out right
You're in my horizon, everywhere I see
And when I try to reach you, you're right next to me
Everytime I think I'm close, you take me closer
Even now when you're away, I feel you near
You've got a way of making sunshine out' the rain
You've got a way of turning ashes into flames
I can't believe you're making darkness into light
Like you make all the famous cliches sound so right
Everytime I think I'm close, you take me closer
Even now when you're away, I feel you're near
You've got a way of making sunshine out' the rain
You've got a way of turning ashes into flames
I can't believe you're making darkness into light
You're making all my contradictions turn out right
You've got a way of making sunshine out' the rain
You've got a way of turning ashes into flames
I can't believe you're making darkness into light
Like you make all the famous cliches sound so right
