

# Real World

## Foreigner

Days, times we will remember when innocence was lost  
We let our hearts move on  
So many dreams we thought would last forever today it doesn't matter  
All those dreams are gone, they are gone, ooh Tell me how it feels again, oh, show me that it's real and then  
I'll walk away, from my own reflection  
The stranger that I knew, the stranger that was you  
And now I face a cold return to sender, a truce but no surrender  
A voice that won't ring true, where are you? Ooh I reach over the edge and throw a penny in the wishing well  
It's so deep that I can tell That in the real world  
There's fewer stars in the sky  
And in the real world  
You can get hear children cry at night  
This is the real world There is no time, for a life of solitude only hunger and survival  
In the world we were born into, we're alone, ooh  
And it brings me to my knees our father lay me down to sleep  
Father please, pray the Lord my soul to keep Keep us in the real world, keep us in the real world  
Don't have to tell you in the real world  
They'll damn you if you try  
In the real world let it begin with you and I This is the real world  
There's fewer stars in the sky  
This is the real world  
You can get hear children cry at night Now in the real world  
They'll damn you if you try  
And in the real world  
Let it begin with you and I Living in the real world  
Yeah, living in the real world
