

# Distant Memory

## Harem Scarem

(Hess/Lesperance/Ribler)

As I walk into the dawn of another day  
As I turn to face the light, shadows run away  
After everything we've shared, how can we both turn and walk away  
Through every single day, I want you to know, yeah I want you to know  
That our love could be more than a distant memory  
It's not enough to be only a distant memory  
All these changes in my life, it's hard to handle it  
Without a trace of where you've been, I can't get over it  
I find it strange to say, time was on our side only yesterday  
We've got to find a way, baby what went wrong, are we too far gone

Chorus

Living without you is getting the best of me  
Days come and nights go, I don't want to live with the memory

Chorus

Don't be a distant memory  
As I walk into the dark of another day....
