

# Now to War (Electric Version)

## Guided By Voices

There is no boy in me now  
There is no time and I'm alone  
But I am only breathing, breathing around  
I get involved with your crowd They make me feel so alone  
If you could only see me when I'm around  
But this is you and this is war  
It makes me drink even more And I'll have fun then I'll make a mark on you  
I'll tell you all that I am  
How simple feet will walk for free  
Until you injure me again  
(Enter the drag queen)
